IRSA Care Milk

For care and maintenance of oiled and/or waxed surfaces

Basic:

IRSA Care Milk contains natural raw materials as: carnauba wax, bees wax, candelilla wax, shellac wax, shellac natural based emulsifier and water.

Use and Characteristic:

IRSA Care Milk is for maintenance and protection of oiled and/or waxed floors, i.e. wood, parquet- and cork surfaces, wall- and ceiling panels, doors, worktops, furniture, etc. in interior design. To preserve the beauty of a silky mat surface, maintain regularly with IRSA Care Milk.

IRSA Care Milk is solvent-free, high-concentrated, slip-and step resistant, for regular maintenance.

Regular supportive Cleaning:

Before the maintenance of the floor with IRSA Care Milk clean high adhesive dirt with IRSA Soap Cleaner first, following the instruction of IRSA.

Regular supportive Maintenance and treatment of oiled/waxed surfaces:

Shake IRSA Care Milk well before use and apply only on oiled/waxed surfaces!

1. Step

Apply IRSA Care Milk after cleaning with IRSA Soap Cleaner pure or diluted in wiping water (approx. 100ml into 10 litres of water) thin and evenly on the dry surface. Use IRSA Blitzboy with IRSA Tissue.

2. Step

Re-polish after the drying (approx. 30 minutes). The glossy effect can be enhanced by reduced addition of water. Use IRSA Blitzboy with IRSA Tissue or a one-disc-sanding machine with white pad.

Tips and Tricks:

- Generally do not walk or wipe over the treated floor as long as the surface is still moist-shiny.
- Higher or punctual dirt can be removed best with IRSA Soap Cleaner.

Storage:

Keep cool. Do not store or transport under 6°C. Keep opened containers closed and work up soon.

IRSA Care Milk offers the appropriate protection for all floors – in private- or object-areas; prevents early duties of wear and tear and preserves the beauty of the surface.

Please follow the maintenance instruction and technical data sheets to the Natura-Line products of IRSA.

The advice given by us in word, writing and endeavour for the technical application is supplied to our best knowledge, but may, however, only be regarded as an indication without any obligation and does not exempt you from examining the supplied products yourself, if they are suitable for the procedure and purposes intended. Application, use and processing of the products are not within our range of control and supervision, but are at your responsibility exclusively. It goes without saying that we guarantee products of high and good quality, according to the samples.
