## **IRSA Wood - Refresher**

**Anti-grey product for wood - to clean and refresh greyed wood outside for a long-term brightening of the wood colour**

### **Characteristics:**

IRSA Wood-Refresher is a special liquid cleaning product, to refresh and clean greyish wood in outdoors. The natural colour tone of the greyed wood is restored, the fresh warm colour tone is renewed and remains lastingly visible after being treated with the coloured IRSA Oils suitable for outside; IRSA (Exotic) Wood Oil or IRSA Öl Harz Imprägnierung (IRSA Oil - Resin – Impregnation) offer enduring protection and the original colour of the wood, which is visible once again, is sustained.

### **Areas of use:**

IRSA Wood-Refresher is used to clean and refresh wood outdoors (wooden decks, terraces, wooden facades, etc.) which has been greyed by sun and weather. Avoid direct contact with metals (e.g. metal fittings) and plants (cover ornamental and useful plants e.g. with painter's foil); remove coarse, loose dirt and old, heavily built up film layers (e.g. stripping) from greyed wood. Possible algae and moss deposits (green deposits) can be removed in advance with IRSA Aqua Cleaner 5000 Outdoor.

### **Processing/Consumption:**

IRSA Wood-Refresher is used pure or diluted with water (up to 1:5) depending on the level of greying. The wood to be treated should be clean, frost-free and pre-wet. Apply IRSA Wood-Refresher to the wet surface and brush it into the wood with a hard root brush in the direction of the grain. After approx. 15 minutes soaking time, dirt, ingredients etc. are removed with a hard brush, absorbent, lint-free cloth and plenty of water. The process is repeated until the desired colour tone is achieved. Do not let the IRSA Wood-Refresher dry and work in sections for larger areas. After thorough drying, permanently protect the now fresh looking wood by painting it with IRSA (Exotic) Wood Oil or IRSA Öl Harz Imprägnierung (IRSA Oil Resin Impregnation). Do not process below 8°C. Depending on the degree of dirt, use 1 litre for approx. 10 - 50 m<sup>2</sup> (for 1 m<sup>2</sup> between 20 – 100 ml).

### **Shelf life:**

Do not store and transport below +6°C or for longer periods of time above 30°C. Can be stored for several years in the unopened original container. Close opened containers tightly and use up soon.

### **Ingredients:**

IRSA Wood-Refresher contains oxalic acid, non-ionic surfactants and water.

### **Clues:**

Causes severe eye damage. Safety Material Data Sheet is available on request. If medical advice is necessary, have packaging or identification label ready. Keep out of the reach of children. Read the identification label before use. Wear protective gloves and eye/face protection. WHEN GETTING INTO CONTACT WITH EYES: Gently rinse with water for several minutes. Remove existing contact lenses if possible. Keep rinsing. Call TOXIC INFORMATION CENTRE or doctor immediately. Do not fill into containers intended for food. Keep away from food, drink and feed. Do not discharge into drains.

Our technical application advice, whether verbal or written and based on tests, is given to the best of our knowledge, but is only non-binding and does not release you from the obligation to check the products supplied by us for their suitability for the intended processes and purposes. Application, use and processing of the products are beyond our control and are therefore exclusively in your area of responsibility. It goes without saying that we guarantee pattern-compliant and consistent quality of our products. When a new "Technical Data Sheet" appears, the previous one loses its validity!
