

We will support the FYD Project,
including „**Hold a hand for the World**“.

10 years abroad for humane engagement

IRSA®

The Project FYD Adventure supported by IRSA

Frank Ladewig is prepared very well, to fulfil his dream. Therefore, he founded his charity organization FYD-Adventure e. V.

He wants to realize for 10 years a research and discovery trip with people like him in the spirit of global international understanding, by using an expedition yacht built especially for this purpose.

The expedition yacht is a catamaran: Length 15 m, breadth 7 m, draft 0.9 m. Donated IRSA products are used for the protection of the wood surfaces.

Furthermore, IRSA is a supporting member of FYD and thus supports the goals and purpose of this association.

Dreams come true, developmental cooperation is carried out in different countries, scientific findings of doctors, technicians, agronomists, veterinarians and teachers are exchanged, collected and documented.

In the 10-year world circumnavigation with terrestrial expeditions, members, researchers and guests will visit more than 100 countries and travel approximately 113,500 nautical miles (210,000 km) by sea.

The entire project will be filmed in a long-term documentation, in order to preserve valuable knowledge for the future generation.

The project goes hand in hand with the initiative „Hold a Hand for the World“, which is shown by FYD-Adventure with the hand symbol.

Lilo Sallinger discusses with the initiator of FYD Adventure Frank Ladewig type and extension of the support for „FYD Project“.
